**KOLEJ YAYASAN PELAJARAN JOHOR  
FINAL EXAMINATION**

---

**COURSE NAME : FINANCIAL MANAGEMENT**  
**COURSE CODE : DAC2053**  
**EXAMINATION : DECEMBER 2022**  
**DURATION : 3 HOURS**

---

**INSTRUCTION TO CANDIDATES**

1. This question paper consists of **ONE (1)** part : **PART A (100 Marks)**
  
2. Candidates are not allowed to bring any material to examination room except with the permission from the invigilator.
  
3. Please check to make sure that this examination pack consist of:
  - i. The Question Paper
  - ii. An Answering Booklet
  - iii. Time Value of Money Tables

---

**DO NOT TURN THIS PAGE UNTIL YOU ARE TOLD TO DO SO**

---

*This examination paper consists of **10** printed pages including front page*

**PART A**

This part consists of **FIVE (5)** questions.

Answer **ALL** questions in the **Answering Booklet**.

**QUESTION 1**

- a. Dahlia Bhd. collects its account receivables in 55 days after credit sales are made and pays its account payables obligations in 40 days after credit purchases are placed. The firm's cost of goods sold (COGS) for the year is RM600,000 and its closing inventory amounts to RM40,000. (Assume 360-day in a year).
- i. Calculate the firm's cash conversion cycle (CCC)  
(5 marks)
  - ii. The firm is able to extend its payment period to 55 days by using new supplier; due to this its inventory conversion period will be lengthened by 6 days. Calculate the new CCC. Should the firm change to the new supplier?  
(4 marks)
- b. Digital Products is involved in the production of television parts and has the following information:
1. Annual unit usage is 500,000. (Assume a 50-week year in your calculation).
  2. The carrying cost is 20% of the purchase price.
  3. The purchase price is RM2 per unit.
  4. The ordering cost is RM90 per order.
  5. The desired safety stock is 15,000 units. (This does not include delivery-time stock.)
  6. The delivery time is one week.

Given the preceding information:

- i. Determine the optimal EOQ level. (3.5 marks)
- ii. How many orders will be placed annually? (2 marks)
- iii. What is the inventory order point? (3.5 marks)

## QUESTION 2

- a. The financial manager at Suri Company is considering an investment that requires an initial outlay of RM50,000 and is expected to result in cash inflows of RM10,000 at the end of year 1, RM12,000 at the end of each year 2 and 3, RM15,000 at the end of year 4, RM9,000 at the end of year 5, and RM8,000 at the end of year 6.

**Required:**

- i. Draw and label a time line depicting the cash flows associated with Suri Company proposed investment. (Use arrows to demonstrate how compounding is used to find future value and how discounting is used to find present value by considering all of the cash flows.) (10 marks)
  - ii. Which approach (future value or present value) do financial managers rely on most often for investment decision making? Why? (2 marks)
- b. In 15 years, you plan to retire and buy a house in Langkawi Island. The house you are looking at currently costs RM225,000 and is expected to increase in value each year at a rate of 5%. Assuming you can earn 10% annually on your investment, how much must you invest at the end of each of the next 15 years to be able to buy your dream home when you retire? (6 marks)

**QUESTION 3**

Gemilang Publishers is considering the purchase of one of two microfilm cameras, Pixon and Qanon. Both should provide benefits over a 10-year period, and each requires an initial investment of RM4,000. Management has constructed the following table of estimates of rates of return and probabilities for pessimistic, moderate and optimistic results.

	Pixon		Qanon	
	Probability	Return	Probability	Return
Pessimistic	0.25	20%	0.30	15%
Moderate	0.50	25%	0.50	25%
Optimistic	0.25	30%	0.20	35%

**Required:**

- Calculate the expected return for each camera.  
(7.5 marks)
- Calculate the standard deviation for each camera.  
(7.5 marks)
- Given your answer in (a) and (b), which investment is better? Why?  
(2 marks)

## QUESTION 4

Philips Company has asked a group of financial consultants to help them determine their component and average cost of capital. The consultants have been able to gather the following information:

1. The current price of the firm's 10-year, RM1000 face value, 10% annual coupon bonds is RM1,150. There would also be a floatation cost of RM25 per bond. The marginal tax rate is 34%.
2. The price of the firm preferred stock has a current price of RM80 and pays dividends of RM8 per year.
3. The common stock has a current price of RM30 per share; however, floatation cost of 5% per share are expected. The company expects to pay RM2 per share in annual dividends next year, and has an expected annual growth rate in dividends of 6%.
4. The market value of the sources of financing are debt at RM2,000,000, common stock at RM5,600,000, and preferred stock at RM2,400,000.

**Required:**

- a. Determine the following:
  - i. cost of debt (10 marks)
  - ii. cost of preferred stock (2 marks)
  - iii. cost of newly issued of ordinary share (3.5 marks)
- b. Calculate the firm's weighted average cost of capital. (5.5 marks)
- c. Explain briefly why firms need to calculate the firm's WACC? (2 marks)

## QUESTION 5

Eltrax Company has two projects under consideration. The cash flows for each of them are shown in the following table. The firm has a 12% cost of capital.

	Project A	Project B
Initial investment	-RM110,000	-RM110,000
Year	Cash flows (RM)	
1	20,000	35,000
2	30,000	35,000
3	40,000	35,000
4	45,000	35,000
5	46,000	35,000

**Required:**

- Determine the payback period for each project. (5 marks)
- Calculate the net present value (NPV) for each project. (7 marks)
- Calculate the profitability index (PI) for each project. (3 marks)
- Calculate the internal rate of return (IRR) for project B. (4 marks)
- Given IRR for project A is 16.7% and provided both projects are mutually exclusive, which project should be accepted? Explain. (3 marks)
- Identify **two (2)** disadvantages of utilising the payback period method in capital budgeting. (2 marks)

[100 MARKS]

END OF QUESTION PAPER
